UI/UX Design principles

Motivated Computer Software Engineer graduate with a comprehensive background in front-end and back-end development. Looking to leverage my robust technical skills, adaptability, and passion for software development in a Junior Developer role. Committed to lifelong learning and continued professional growth in the field.

Projects

2023-02 - 2023-03

Full Stack Course Management System

- Developed a full stack course management system featuring review, update, creation, and deletion operations, all subject to user permissions.

- Built user management features including sign up, login, and access control, and implemented CRUD operations and user authentication.

- Fostered seamless interaction between the client side and server side components.

- **Technologies used:**
  Front-End : *React, JavaScript, CSS.*
  Back-End : *Express, Sequelize , SQLite, Basic Auth*

2022-12 - 2023-01

SQL Library Manager

- Created a dynamic book library, incorporating pagination and search functionalities to enhance user experience.

- Implemented key operations such as storing, retrieving, updating, and deleting data, honing core skills required for software development.

- Gained hands on experience with Node.js, Express.js , and SQL ORM Sequelize environments.

  Technologies used: *JavaScript, CSS, Node.js, Express.js , Pug, SQL ORM Sequelize*

2022-11 - 2022-12

React Gallery App

- Developed an image gallery app using the React library, following modern single page application architecture to ensure speed, modularity, and adherence to current web development trends.

- Implemented route setup and API fetching with Axios , and incorporated a search bar for increased user friendliness.

  Technologies used: *React, JavaScript, JSX, React Router, CSS.*

Education

2019-03 - 2021-06
